

# Urantia Pearl

## What is a Urantia Pearl ?

"Urantia Pearl" is new symbolism derived from the following quote in the Urantia Papers, our planet's Fifth Epochal Revelation. That the pearl is the only jewel made by a living creature provides the symbolic association with the continuing spiritual advancement of our planet, Urantia, in its march to light and life. For as the planet advances by the efforts of continuous generations of living mortals so does the pearl develop by the responses of the oyster to its stimulating environment:

"You were truly among the least of all creation until Michael's bestowal elevated your planet to a position of honor and great universe interest" (41:10.5)

The Urantia Pearl geometric symbol consists of four nested circles having incremental diameters in 1,2,3,4 relationship. For example, diameters of 100, 200, 300, and 400 units reflects the diameters of one set of Urantia Pearl circles. These incremental diameters are symbolic of the purposeful and guided steps whereby mortals ascend to the many advancement plateaus in the local universe before they continue with the Paradise ascent.

Also, the four nested circles are positioned to create an abstract representation of the universe circuits, representation that is reminiscent of the concentric circles symbol revealed in the Urantia Papers. Unlike the concentric circles symbol with its white and azure blue colors, the Urantia Pearl symbol may display the circles' geometry in any media and with the artistic embellishment and colors preferred by the artist, symbolism of universe-mandated free will.
